Technical Service Bulletin

**Topic: Timer Wire Configuration On Valley Style Tower Control Box
ICII P/N 9102 (STALL).**

There is a change in the wiring of the Electronic versus Motorized timers. To identify which timer you currently have, the model number is above bar code. Model number starting with "BR1" are motorized timers and "BRE" are electronic timers.

The motorized timer (Figure.1) below shows a jumper wire between terminal 4 and terminal 6. On the electronic timer (Figure.2), the jumper wire is between terminal 3 and terminal 6. Please make sure your technicians are aware of the change. Thank you.
