“With over 35 years of experience and personal knowledge in providing power transmission products to the center pivot industry, Irrigation Components International is uniquely positioned to provide our customers a quality product at a price they can afford. We understand the interactions between soil types, terrain, sprinkler selection, and span weights have on a gear box life span. These design inputs, and many more, were taken into account in developing our new ICII product line.”

-John McCabe,

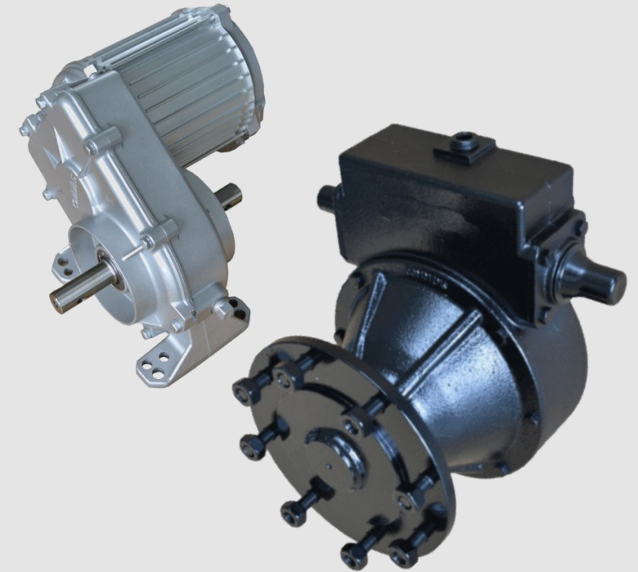

Founder and CEO
